

You are invited to attend a CME-certified satellite symposium

INVASIVE VERSUS NONINVASIVE CORONARY ANGIOGRAPHY

Guidelines for Achieving Optimal Outcomes

Thursday, May 7, 2009

12:00 – 1:00 PM

Room: Augustus 1 | Caesars Palace | Las Vegas, Nevada

ACTIVITY OVERVIEW

This symposium will provide a forum for discussion of invasive and noninvasive coronary angiography in various clinical settings with the goal of addressing the guidelines that have been established to aid in identifying patients who would benefit most from specific interventional modalities.

AGENDA

- 12:00 – 12:05 PM** Opening Remarks
Peter A. McCullough, MD, MPH, FACC (Chair)
- 12:05 – 12:25 PM** Invasive and Noninvasive Coronary Angiography:
Guidelines to Determine the Appropriate Technique
for Your Patient
Matthew J. Budoff, MD, FACC, FSCAI
- 12:25 – 12:45 PM** Advantages and Disadvantages of Invasive Versus
Noninvasive Angiography
Peter A. McCullough, MD, MPH, FACC
- 12:45 – 1:00 PM** Discussion/Questions and Answers
Faculty

ACCREDITATION

The Center for Bio-Medical Communication, Inc. (CBC) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

This CME activity was planned and produced in accordance with ACCME Essentials.

CME CREDIT

CBC designates this educational activity for a maximum of 1.0 *AMA PRA Category 1 Credit™*. Physicians should only claim credit commensurate with the extent of their participation in the activity.

*This event is not part of the
official SCAI Annual Scientific
Sessions as planned by the
SCAI Program Committee*

Sponsored by

This activity is supported
by an educational grant
from GE Healthcare.

INVASIVE VERSUS NONINVASIVE CORONARY ANGIOGRAPHY

Guidelines for Achieving Optimal Outcomes

Thursday, May 7, 2009

12:00 – 1:00 PM

Room: Augustus 1 | Caesars Palace | Las Vegas, Nevada

FACULTY

CHAIR

Peter A. McCullough, MD, MPH, FACC

*Consultant Cardiologist and Chief
Division of Preventive Medicine
William Beaumont Hospital
Royal Oak, Michigan*

Matthew J. Budoff, MD, FACC, FSCAI

*Associate Professor of Medicine
Program Director and Director of Cardiac CT
Division of Cardiology
Harbor-UCLA Medical Center
Torrance, California*

EDUCATIONAL LEARNING OBJECTIVES

Upon completion of this activity, participants will be able to:

- Describe the various imaging techniques that are available
- Compare the advantages and disadvantages of both invasive and noninvasive angiography interventions in a variety of clinical settings
- State the properties of available contrast media
- Explain the safety concerns associated with noninvasive and invasive modalities
- Accurately assess the strategies to manage the risks inherent to both invasive and noninvasive techniques

TARGET AUDIENCE

This activity will be geared towards cardiac interventionalists, general cardiologists, specialists in cardiac imaging, cardiac imaging technologists, cardiac catheterization laboratory technicians, cardiac care nurses, and other healthcare personnel involved in the care of patients requiring cardiovascular angiography and interventions.

DISCLOSURE STATEMENT

CBC relies upon its faculty to provide information in a manner that is objective and free from bias. All instructors are asked to disclose any real or apparent conflict of interest related to the context of their participation. Their disclosure statements will be available for inspection. Each faculty member will also disclose discussions of unlabeled or investigative use of any commercial product.

As part of CBC's mechanism for resolving potential conflicts of interest, the contents of this activity have undergone peer review by an independent CME reviewer.

**No preregistration is required.
Hot lunch will be served.**
